

# Installation Instructions

## What you'll need in addition to the Lazy Crazy Garden System ...

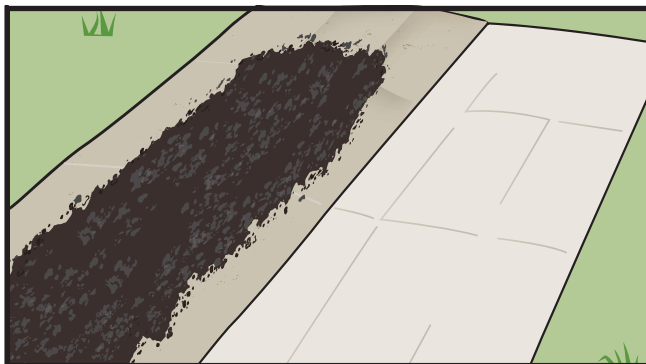

- 3 - 4 bags of garden soil (approx. 3.5 to 4 cubic ft.)
- Fertilizer (optional)
- Seeds or seedlings
- Hammer & garden rake

- 1** For best results, cut grass as low as possible before utilizing the Lazy Crazy Garden System. Lay system on the ground with TOP SHEET label facing up. Install 10 anchors along one side 3" from edge of sheet.

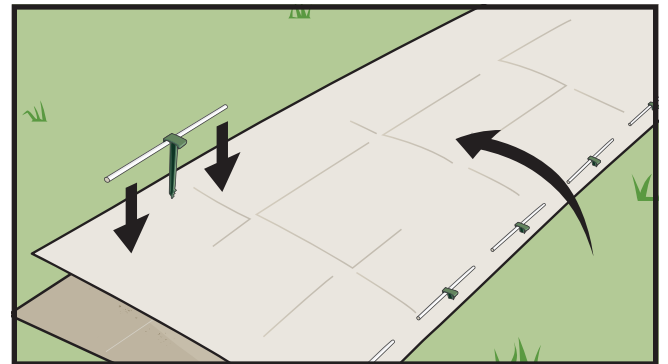

- 2** Fold top sheet open and pull back over anchored side.

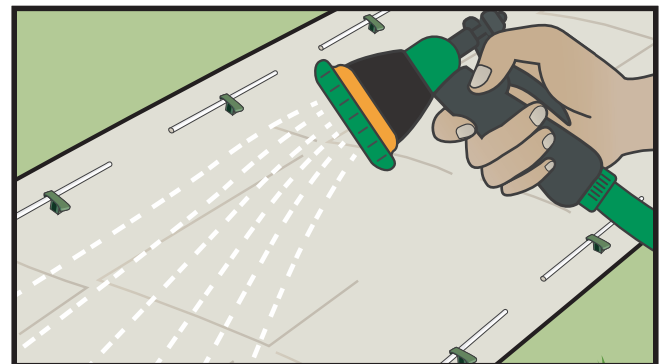

- 3** Spread garden soil on bottom sheet, keeping 4" clear space around the edges. Depth of soil should be 4" for most seed planting.

- 4** **SEED PLANTING:** Plant seeds per seed pack instructions and cover with soil to specified depth. Fertilize, if desired. See Supplemental Instructions for Seedling Planting.

- 5** Fold top sheet over soil and seeds and anchor the remaining three sides. Install anchors 3" from each edge. Use 10 anchors per side and 2 per end of main unit.

- 6** Water thoroughly with light shower spray for several days keeping top sheet moist.

## What To Expect

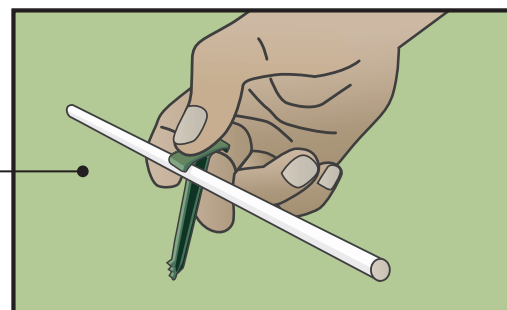

As seeds sprout over several days, the top sheet will begin to dissolve and roots will begin growing through the bottom sheet.

**THE ENTIRE SYSTEM IS BIODEGRADABLE** and will return to the earth over time. Feel free to replant same area with a new Lazy Crazy Garden System season after season.

## Supplemental Instructions

- **CUT GRASS** to a height of 1 – 1.5" before utilizing the Lazy Crazy Garden System.

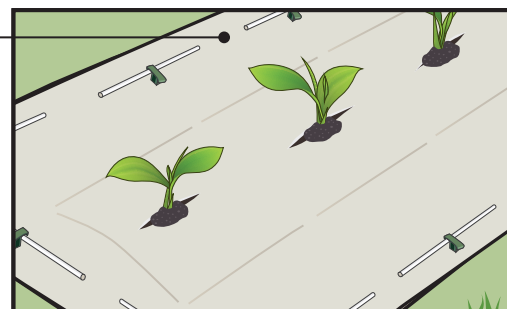

- **ANCHORS:** Place paper stick underneath lip of green garden stake and drive through Lazy Crazy Garden System into the ground with a hammer. Space stakes approximately one foot apart and 3" from each edge.

- **FOR FAST GERMINATING SEEDS:** Seeds may sprout before top sheet dissolves. If this occurs, cut a slit along top sheet and fold back allowing the plants to emerge.

- **FROM SEEDLINGS:** Use same steps as seed planting, but utilize a garden soil center mound 6" tall and 12" wide. Fold top sheet over soil and anchor on remaining three sides. Cut slits through top paper, plant seedlings utilizing recommended spacing. For best results, seedlings should be 1 foot or shorter. Add additional soil around base of each seedling for better stability.

- **WEED BLOCKER/GARDEN ACCESS:** If planting multiple rows, use optional Weed Blocker paper and additional anchors provided between rows. Prior to anchoring remaining three sides in Step 5, place edge of Weed Blocker over edge of Lazy Crazy Garden System and anchor together. Add 1 anchor at center of each end of weed blocker/ garden access sheet. (will have used 26 anchors total). Multiple systems may be arranged side by side or end to end.
